Mountain Weather Forecast

Southwest Highlands

Including Ben Nevis, Glen Coe and the rest of Lochaber, Argyll including the Isles, Loch Lomond, Trossachs and Arran
Forecast valid from 06:00 on Friday 21 Jan 2022 until 23:59 on Saturday 22 Jan 2022

Forecast Issued on Friday 21 Jan 2022 at 04:22 by Met Office Aberdeen

Confidence: High confidence for southwesterly airflow through the period bringing mostly cloudy and mild conditions. There is uncertainty in the extent of cloud breaks and also for rainfall from Sunday.

Headline for Friday 21 Jan 2022: Some morning brightness in the east, otherwise overcast, dull and increasingly drizzly.

Forecast for Friday 21 Jan 2022

Weather: The day will be dominated by extensive low cloud shrouding most areas, this bringing some patchy rain or drizzle at times too. Areas east of Loch Lomond may see bright or sunny spells initially before low cloud arrives. Drizzle likely becoming more persistent through evening.

Chance of cloud free mountain/hill tops above 800m: 50% in east through morning, otherwise virtually nil.

Visibility: Cloud will be extensive above 300-400m across most areas leading visibility to be severely reduced away from glen level and navigation will naturally be tricky. Cloud may be slow to spread across Loch Lomond and the Trossachs, these areas seeing the best conditions through morning. Lower slopes turning hazy in drizzle too.

300	4/2	4/2	5/2	5/2	5/1	5/2	6/2
Glen	5/4	6/5	7/5	7/4	6/4	7/4	7/4
Freezing Level*	900m	1400m	1100m	1000m	1000m	1200m	1300m

**Level above which ground is expected to be frozen/snow is expected to settle.*

Met Office Aberdeen Meteorologist's View
A cloud inversion may develop, leaving ground above 1200m or so cloud free.

Forecast for Saturday 22 Jan 2022
Weather: Another day of poor visibility and spells of rain or drizzle, this more extensive than on Friday as winds back southwesterly, therefore removing the shelter afforded to the eastern ranges. Mild for the time of year.

Maximum wind: West or Southwest 20-25mph gusting 35mph.

Chance of cloud free mountain/hill tops above 800m: No chance.

Visibility: Cloud will remain extensive above 300-400m but may lower further at times across southwest facing slopes, this leading to widely poor visibility, often a kilometre or less. Rain and drizzle will turn lowest slopes hazy too.

Temperature: **Glens:** Around 9 Celsius throughout.
At 800m: Plus 2 or 3 Celsius.
Freezing level: 1200m or above.
